Executive Summary – KPI Performance Overview

- **Total revenue stands at $12.6M** across all transactions, with electronics dominating at $9.6M (76% of total revenue) and the highest profit margin at 75.5%.
- **All product categories are highly profitable**, with margins ranging from 71–76%. Sports & Outdoors and Pet Supplies drive meaningful volume but remain significantly smaller than electronics.
- **Female customers account for 84.6% of total revenue** ($10.4M) despite a similar average order value to males ($581 vs $594), suggesting a much larger female customer base (599 vs 83 customers).
- **Peak revenue months were August 2023, September 2021, and April 2023**, with top months generating ~$300–316K. Understanding the drivers behind these spikes could help replicate performance.
- **Action needed:** Age group analysis failed due to a data gap — customer age/birth date data appears missing, which limits demographic targeting insights and should be flagged for the data team.
